

CarryBee - Product Management

Section A — Merchant Side (50%)

### **Task 1: Merchant Experience Improvement**

Scenario

CarryBee merchants complain that Order Creation is slow and they manually input data repeatedly.

CarryBee is planning OCR Order Creation (AI Entry).

Candidate Task

In max 1.5 pages:

1. Identify merchant pain points
2. Propose MVP solution
3. Draw basic user flow
4. List 3 success metrics

What We Assess

- Merchant empathy
- Product thinking
- UX understanding

### **Task 2: Merchant Feature User Stories**

Scenario

CarryBee launching Notification System for merchants.

Write 5 user stories:

- Order update
- Payment update
- Delivery delay
- Failed delivery
- Promotional notification

Include:

- Acceptance criteria
- Priority

What we assess

- Clarity and structure of user stories and Quality of acceptance criteria

Section B — Operations / Internal (50%)

### Task 3: Operations Problem Solving

Scenario

CarryBee Operations team struggles with Trackless Parcels.

Candidate Task

In 1 page:

- Possible root causes
- A simple feature to fix
- Which users involved
- Expected impact

What we assess

- Understanding of operational workflow
- Root cause analysis
- Simplicity and practicality of solution

### Task 4: Prioritization Exercise

You have following backlog:

Merchant Side:

- Fraud Checker
- Online Payment on Delivery
- Tracking Microsite

Operations Side:

- Reverse Pickup
- Issue Resolution Panel
- Agent Commission Management

Task

You have 1 sprint.

Prioritize and explain:

- What goes now
- What later
- Why

What we assess

- Prioritization logic (impact vs effort)
- Balance between merchant and operations needs
- Justification clarity
